### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

While it is known in the art to provide a waste treatment system with an electric generating device using a fuel recovered from organic waste, a methane fermentation bath anaerobically fermenting the organic waste (see US Pat No 3,336,220 to Neidl) and it is known in the art to provide anaerobically treated waste from a fermentation bath to an electrolysis bath (see US Pat No 3,711,392 to Metzger), in the examiner's opinion, the prior art fails to teach or fairly suggest combining the known feature to arrive at the instant invention. In particular, it is noted that the closest prior art, Neidl, appears to teach away from using direct or electrolysis current in order to keep the decomposition rate high.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
